Primary Key: director_id

Movies:
Attributes: title, genres, release_date, rating, director, cast, budget, box_office, duration
Primary Key: title

Relationships:
Actors and Movies: Each movie has a cast of actors. This relationship can be represented as a many-to-many relationship if we assume multiple actors per movie.
Directors and Movies: Each movie has one director, creating a one-to-many relationship from directors to movies.
